

TDK Dental Lab

Turnaround Times

A quick reference guide for dental practices. Confirm current timings with TDK before publishing fixed service commitments.

How Turnaround Times Work

Turnaround times can vary according to the type and complexity of the case, the quality of the information supplied, digital design approvals, material or component availability and delivery arrangements.

Service	Typical Turnaround	Notes
Crown & Bridge	[Confirm]	Timing may vary by material, design and approval.
Dentures	[Confirm]	Complex cases, try-ins and adjustments may require additional
Implant Laboratory Work	[Confirm]	Depends on implant system, components and case requireme
Digital Design	[Confirm]	Timing depends on case complexity and approval.
Repairs / Adjustments	[Confirm]	Subject to assessment and laboratory workload.

Factors That May Affect Timing

- Incomplete or unclear laboratory prescriptions
- Poor-quality impressions, models or digital scans
- Changes requested after design approval
- Availability of specific materials or components
- Courier or transport delays
- Additional clinical or technical information required

Please Note

The timings shown on this document should be treated as guidance unless a specific completion date has been agreed with TDK Dental Lab. Replace all [Confirm] fields with TDK's approved current turnaround times before publishing this document on the website.
